JavaScript

Bootstrap

GSAP

WordPress

GitLab

Jira

I'm a UI/UX developer with 10+ years of experience in the Defense & Space industry and an active TS/SCI with CI poly. I design websites and applications that turn complex information into clear and usable experiences.

Experience

CACI International Inc.
UI/UX Designer & Web Developer, Aug 2023 - Present

Designed and coded the front-end for 12+ custom websites, delivering tailored designs, optimizing content organization, and creating client-facing documentation to facilitate ongoing site maintenance

Extended advanced search capabilities for the agency's main content platform by adding a custom modal with intuitive filters to improve the search experience across thousands of multimedia assets

Transformed our creative agency's website from a simple intake form into a modern e-commerce-style portfolio showcasing our services through video integration, dynamic galleries, and interactive design elements

Designed a responsive intel dashboard with a streamlined layout, tabbed navigation, and custom icons, and delivered developer-ready specs

Architected a pedometer challenge plugin for step tracking, team creation, goal setting, and leaderboards, and designed a calendar-based tool for booking fitness facilities

Designed an art exhibition website and implemented the front-end functionality including an interactive gallery and dynamic submission form

Overhauled the website design and restructured the information architecture for a government contracts office to better serve a diverse user base

Verite Group Inc.
Software Developer, Aug 2022 - Apr 2023

Conducted research into user behavior regarding mobile phone location and privacy permission settings to streamline app onboarding experience

Shaped future development efforts by creating a Python script to scrape web data for download and usage statistics of popular open-source projects

Raytheon Technologies
Sr. Software Engineer I, Jun 2019 - Aug 2022

Developed and maintained 50+ tools, scripts, and webpages utilized by vehicle engineers using Ruby on Rails, Perl, and SQL

Moderated the adherence of newly created webpages and dashboards to style guide parameters and accessibility standards

Built a custom audit tool with a streamlined UI for creating and editing audit reports and a backend database to seamlessly handle concurrent users

Innovated a tool to auto-generate vehicle metrics reports and regularly update a dynamic webpage resulting in hundreds of hours saved

Peraton Inc. (formerly Perspecta and Vencore)
Systems Engineer I & II, Oct 2015 - May 2019
